

## **CUSTOM LALA UNIT – WITH UNDERSLUNG BASIN**

Name: LALA CABINET  
QTY: X1

Dimensions: 1500 L x **600 W** x 900mm H

Powder coat finish: Graphite Black [Fine Texture]

**TINLAB - query:**

No Shelves inside please.

Please confirm if there are any vertical dividers inside.

**DOKTER & MISSES - answer:**

Yes we will only put a base shelf in steel.

No vertical dividers

A. As per previous communication, Please note that we need a cut-out in the base of this unit; Due to the raft foundations, the plumbing won't be coming through the wall behind the cabinet as standard practice.

opening flush with the back of the unit [so no structural element can cross this cut-out] for the unit to slot around the 110mm dia. pipe protruding from the slab;

**We propose this cut-out is at least 400mm wide x 200mm from back to front so the main contractor have play around this 110mm pipe to ensure the unit is centred to the wall;**

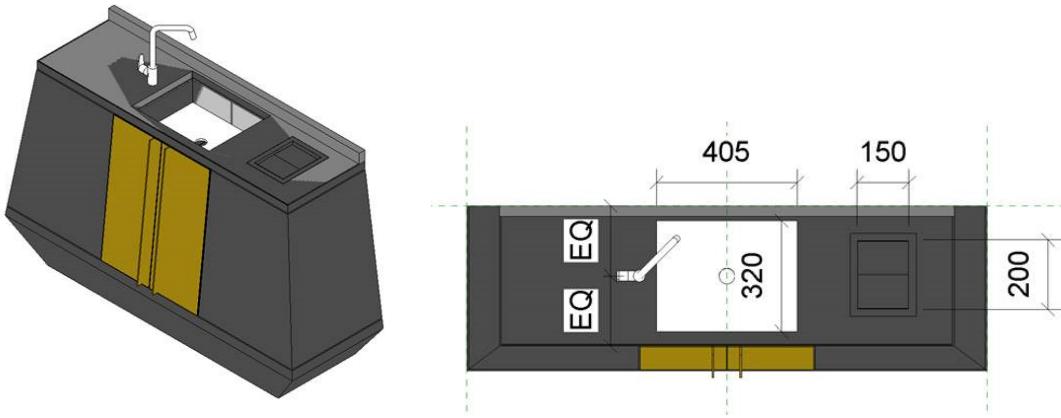

**Refer to the below site photo.**

B. The water point will be installed in the wall behind the unit at around 600mm ffl [water feed is coming from above so we **need a cut-out in the back panel for the connections to the water points in the wall;** Hot and Cold water point will be installed;

**We propose the cut-out in the back panel to start at ground floor [base of unit] and finish at 700mm FFL; Cut-out = 400mm W x 700mm High**

**Refer to the below site photo.**

**Dokter & Misses made some changes to the standard Lala unit to accommodate an underslung basin for Nando's Northmead Drive Thru in 2019:**

- a. We would love to use the same design for Nando's Gezina Drive Thru, Graphite Black unit with Acid Yellow colour block doors.
- b. Adriaan confirmed per email the last time that he made the standard Lala unit **600mm deeper to fit the basin**. Please can we do this again for this unit.
- c. Provide the **150 x 200mm flip-top [graphite black] in the granite top** on the right side of the basin;
- d. Bin to fit underneath this hole with flip-top;  
Nando's will supply the bin; bin size of 300 x 300 x 550-H will fit;
- e. We ordered the following basin from Rossco for Northmead Drive Thru and want to use the same spec.  
Supplier: Rossco  
Name: Underslung – Swift  
Size: The internal measurements are: **Medium basin [405mm L x 320mm W [front to back] [code: SWUSM]**

Underslung - Swift

520mm left to right  
340mm front to back  
Composite  
Underslung

Our range of Swift underslung basins come in 3 sizes. The INTERNAL measurements are as follows:

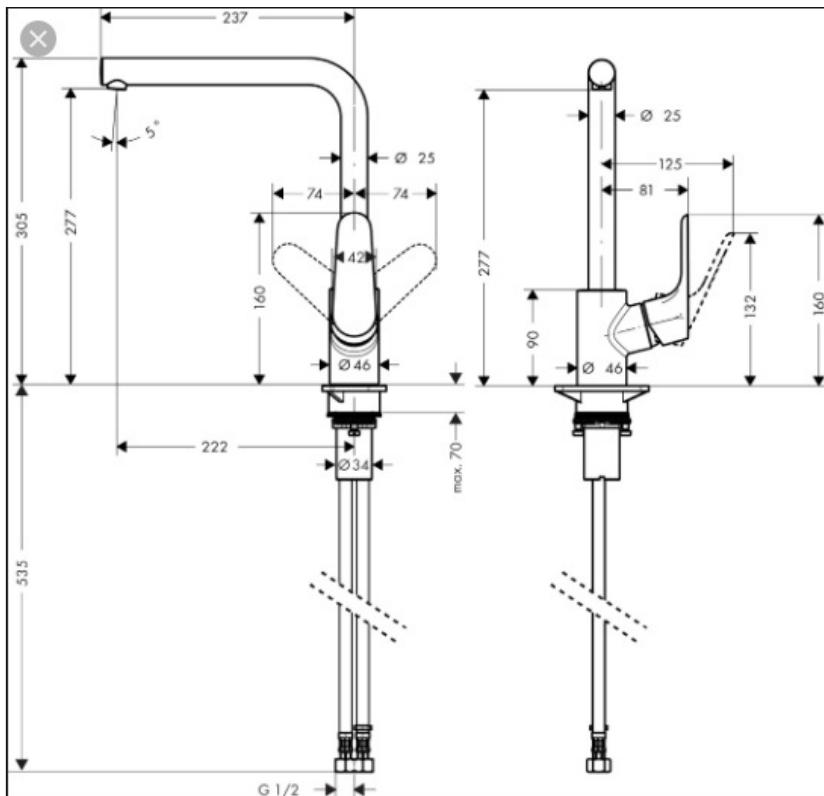

- Small: 360mm (A) x 310mm (B) - Code: SWUSS
- **Medium: 405mm (A) x 320mm (B) - Code: SWUSM**
- Large: 520mm (A) x 340mm (B) - Code: SWUSL (White) / SWUSLB (Black)

*Remember to cut the granite slightly smaller than the internal measurements of the basin. 15mm smaller should work well.*

**Code SWUSL**

f. Herewith the spec for the Tap from Water ways:

- The tap will be mounted centred to the left side of the basin – same as the one you did for Northmead Drive Thru.
- The tap will be installed by the plumber. Please can you provide the hole for it in the correct location;

g. **Stone top:**

- 30mm thick Rustenburg Granite top;
- Honed finish;
- 50mm high splashback along the back only [to provide the 50mm high splashback as a loose item to be installed by the main contractor];
- *As per the website: Remember to cut the granite slightly smaller than the internal measurements of the basin. 15mm smaller should work well.*
- The basin will be delivered to your premises as was done with Northmead [99 Juta St, Braamfontein, Johannesburg, 2001] so you can install the basin;
