hardwood chairs in oak grey oil

with Y table in iroko grey oil

3000 x 1000 x 750mm high

DETAILS :

HARDWOOD CHAIR :

The Hardwood Chair is a striking contemporary dining chair design. The gentle curves of the backrest and the shaped timber seat are offset by the crisp lines of the angled timber legs. The elegant scoop in the timber backrest provides comfort as well as the characteristic attention to detail found in all our pieces, exposing beautiful, traditional joinery techniques.

This design is available in a number of timbers and finishes. It can also be done in painted finishes, please enquire for colours. We can also make this design with an upholstered seat (fabric or leather) of your choice, which you can provide.

If made in Iroko with a weatherproof fabric upholstered seat you can use the Hardwood Chair in an outdoor environment. Timber is subject to weathering outdoors as is normal.

FINISHES AND PRICES :

Dimensions :

540 w x 520 d x 770mm high (seat 450mm high)

Prices :

Oak | Ash | Iroko - Natural | Grey Oil finish - R 3,800.00 excl. vat

Ash - Dark Charcoal | Painted finish - R 4,200.00 excl. vat

Options :

Upholstered seat - same prices as above, fabric to be provided

650 x 650mm per seat, do not cut to size.

prices above as of Jan 2018 - subject to change without notice.

CARE INSTRUCTIONS : INDOOR + OUTDOOR

YOU WILL NEED :

soft cloths | rags

water

INDOOR :

In order to retain the natural finish of the timber we keep the number of protective coats to a minimum. Although this does add to the aesthetic appeal of the product, highlighting the natural qualities of solid wood, it does mean that the finish is not impervious to damage and staining. However, if you follow the instructions laid out below, it should be sufficient for normal use.

Do not expose these products for any extent of time to pools of water. If the products get wet you should dry them off as soon as possible. Light scuffs can gently be wiped off with a damp cloth and some soapy water.

With the painted and dark charcoal finish, the finish is susceptible to wear. Although the chairs are professionally air gun painted with a durable finish, they will not be impervious to damage and care should be taken when placing chairs around a table etc.

We do not recommend that you place indoor furniture outdoors. Outdoor furniture is specially designed to be able to withstand the dramatic temperature changes and moisture in the air. Avoid placing timber furniture items in full sun as exposure to sun/uV causes yellowing and light surface cracks.

Heavily airconditioned environments require the use of an humidifier to restore the natural humidity of the air, as dry air will result in cracking / warping of the timber.

OUTDOOR :

This design should only be used outdoors when made from Iroko timber with a grey oil finish and an upholstered weatherproof fabric seat. When kept outdoors light surface cracking, discolouration and warping of the timber will naturally occur. Your timber will develop a silvery grey patina.

Should you wish to delay the natural aging process of your outdoor furniture, apply outdoor furniture oil more regularly. This can be done once a year (depending on the exposure). Light coats of furniture oil can be applied with a cloth and then removed, or brushed on and wiped off after 10 minutes. We would recommend you remove your upholstered seat before applying the oil to avoid stains. Please contact us should you require additional oil or a maintenance kit.
